DETAILED ACTION

1. This action is in response to the communication of the US Application No. 10/801,322 filed March 16, 2004. Claims 1-23 are pending.

Specification

2. On page 2, there is an error in the section titled "Cross Reference to Related Applications". Line 3 recites "Application Serial No. 09/023,813, filed February 13, 1998, now US Patent No. 6,280,327." Application Serial No. 09/023,813 is an abandoned application that never matures to a patent. The words ", now US Application No. 6,280,327" needs to be deleted. Correction is required.

Terminal Disclaimer

3. The terminal disclaimer filed on September 20, 2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of US Patent No. 6,585,596 and US Patent No. 6,719,633 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject

Art Unit: 3713

matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-23 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 8-18 of prior U.S. Patent No. 6,280,327. This is a double patenting rejection.
